Forecast for Saturday 04 Jun 2022

Weather: A dry start with some clear spells and then intervals of strong sunlight. The sunshine turning increasingly hazy into the afternoon as cloud moves over, bringing the risk of showers, perhaps heavy and with a low risk of thunder. These showers clearing into the evening, allowing for some clearer spells into the evening and night.

Chance of cloud-free hill tops above 800m: 60% until after dawn, becoming >90%.

Low Cloud and visibility: Broken cloud above 400-600 metres likely across eastern hills through the early morning, lifting and breaking soon after sunrise. Cloud then above the hills for the rest of the day with very good visibility, only occasionally dropping in any showers.

Meteorologist's View

Whilst a largely fine day, there'll be a keen breeze with gusty conditions over the summits, making it feel noticeably cooler on higher routes.

Forecast for Sunday 05 Jun 2022

Weather: Cloud soon covering the park as a band of rain and showers arrives in the early morning. The precipitation could be heavy and perhaps with some thunder. A drier but still cloudy interval around late morning and early afternoon before a second pulse of rain arrives for the evening.

Maximum wind: 30mph easterly winds, gusting 40mph, on the summits.

Chance of cloud-free hill tops above 800m: 80% first thing, dropping to 30% by the afternoon.

Low Cloud and visibility: Cloud above the summits to start the day, but visibility becoming very poor in any heavy rain and showers that pass over through the morning. The cloud then lowering to 500m for the afternoon, shrouding many higher routes. Further reductions in visibility likely through the evening in association with the second band of rain.

Temperature: **Valleys:** Plus 8 Celsius, rising to plus 16 Celsius.
At 800m: Plus 5 Celsius, rising to plus 7 Celsius.
Freezing level: Above the summits.
